

C++ and Data Structures Algorithms — Hybrid - Notes

1. Lecture2- Writing the first program - Hello World

I. Syntax :

A specific way to write the programming language or code is called syntax

II. Whole process :

first of all we write the whole code after that compiler read and compile the whole code and after that it'll give us output

III. Return :

it is because to let us know whether the code processing is done or not

IV. Terminal :

where we do all type of compilations
